Executive Summary

Nails by Acacia (Pty) Ltd is a dynamic and inclusive nail salon and training centre located in Dawn Park, Boksburg. The business offers a dual value proposition: professional nail care services and accredited training for aspiring nail technicians, with a strong focus on uplifting unemployed youth and women from surrounding townships like Rondebult.

Our core services include manicures, pedicures, acrylics, nail art, and custom press-on nails, alongside structured educational programs that provide hands-on skills, mentorship, and employment opportunities. With a start-up budget of R250,000, the business aims to operate sustainably by reinvesting profits into expansion, product development, and franchising. Nails by Acacia will implement targeted marketing strategies through social media, seasonal promotions, and partnerships, positioning itself as a leader in both beauty services and education within the nail care industry.

Business and product/service description

Business and product/service description

description of the business

Nails by Acacia PTY LTD is a nail salon and training centre in Dawn Park, Boksburg, offers more than just beauty treatments. its aim to provide high-quality, relaxing nail educational and care services in a hygienic environment It acts as a training and job facility for residents who are particularly the unemployed and youth in Rondebult and Dawn park area and surrounding areas, providing aspiring nail technicians with hands on training and experience with possibilities for future employment .

history of Nail by acacia PTY LTD

The business began as a personal passion project in high school, inspired by a strong interest in art, design, and creativity. What began as a hobby has evolved into a mission to empower unemployed youth and women through beauty education and entrepreneurship.

mission and vision statement

mission

Our mission is to provide exceptional high-quality nail care while educating and employing people who are passionate about the nail industry in a relaxing and hygienic environment.

viision

Our vision is to create a premier nail salon and educational training facility that promotes creativity, talent, and career development in the nail industry.

service description

The Nail by Acacia offers a clean, professional, and welcoming environment in which clients can receive a variety of nail services such as manicures, pedicures, nail art, acrylics, gel applications, and press-on nails. In addition to beauty services, Nails by Acacia has a dedicated training centre that provides structured programs for aspiring nail technicians. This centre provides learners with the practical skills, industry knowledge, and business insights required to build successful and self-sufficient careers in the nail industry.

Nails by Acacia provides individuals with economic opportunities through hands-on experience, mentorship, and job placement assistance, while also actively contributing to the reduction of local unemployment. The salon's long-term goals include expanding into new communities and utilizing beauty and education as tools for empowerment, creativity, and long-term employment.

Copyright, Patents, And Trademark Registration

According to Burnett Attorneys and Notaries (2023) Copyright, trademark, and patent registration are legal tools used to protect intellectual property in South Africa. Copyright protects original works like music, books, and software, whereas trademark registration protects brands and logos, and patent registration protects inventions.

Copyright

Nails by Acacia has created original materials for the salon and training centre, including training guidelines, custom nail art designs, digital content and marketing materials that would be protected by South Africa copyright law, which is granted automatically upon creation. Although registration is not necessary, proper documentation and authorship records will be kept to support any future legal claims

Trademark **TM**

Nails by Acacia's business name, logo, and branding materials will be registered with the Companies and Intellectual Property Commission (CIPC) to prevent unauthorized use of the brand identity. This trademark protection will provide exclusive rights to the use of the name and visual elements in the beauty and education industries.

Business Registration

Nails by Acacia is formally registered as a Private Company (PTY LTD) with the CIPC, which grants it a legal identity and allows it to enter into contracts, open a business bank account, and comply fully with South African Revenue Service (SARS) tax obligations.

Healthy and safety compliance

The salon will follow Department of Health guidelines to ensure a clean, sanitary, and safe environment for clients and trainees. Sanitation, ventilation, and waste disposal procedures will be strictly enforced.

labour Law and employment compliance

The salon will follow Department of Health guidelines to ensure a clean, sanitary, and safe environment for clients and trainees. Sanitation, ventilation, and waste disposal procedures will be strictly enforced.

Training Centre Licensure

According to SETA (s.a) In South Africa normally need to be accredited by a SETA (Sector Education and Training Authority) to deliver particular qualifications or skills programmes. To build on nails by acacia its credibility and provide recognized qualifications, the training centre will seek accreditation from appropriate Sector Education and Training Authorities (SETAs) wherever possible. This will allow the centre to award credentials and promote trainees' job opportunities.

2025

Marketing Plan

Marketing Plan

Location and market description

Location

Nails by Acacia resides in Dawn Park, Boksburg, a developing residential area within the Ekurhuleni Metropolitan Municipality in Gauteng, South Africa. The salon is well-positioned to serve residents of Dawn Park, Rondebult, and the surrounding townships, which include a mix of young people, working professionals, and unemployed people looking for skill-building opportunities. The location is easily accessible via public and private transportation, making it ideal for both clients and trainees.

market description

Nails by Acacia works in the health and beauty industries, specializing in nail care and beauty skill development. The business targets a diverse market of women and men aged 16 to 40 who value self-care, beauty, and personal grooming. In addition to professional nail services, the salon serves unemployed youth and adults in the local community who are looking for practical skills and career opportunities in the nail industry.

Nails by Acacia meets the growing demand for aesthetic care while also providing job-related education. The business is well-positioned to serve clients and students from Dawn Park, Rondebult, and the surrounding areas by providing high-quality service in a clean, welcoming environment that fosters creativity, confidence, and long-term career development.

Potential market share

Market share is calculated by dividing a company's sales over a given time period by the total sales of the industry during that same period. The measurement helps determine a company's size and performance in relation to competitors in the same market. A larger market share typically indicates a stronger presence, greater influence, and increased competitiveness (Haye, 2025).

Nails by Acacia estimates a 4% market share in the local nail and beauty industry in Boksburg. This figure is based on projected service sales, customer demand, and the increasing demand for both nail treatments and professional training services. While the salon is not currently the market leader, it is marketed as an innovative and socially responsible business that provides both quality nail care and education, a specific that many competitors do not serve.

Nails by Acacia stands out from traditional nail salons by focusing on underserved communities like Dawn Park and Rondebult and combining beauty services with skill development. This unique benefit proposition allows the business to develop a loyal customer base while continuously expanding its market presence. Over time, the salon hopes to increase its market share beyond 4% through customer satisfaction, successful marketing, and the development of training services, thereby contributing significantly to both the local economy and the beauty industry.

Target market

Adobe team(2023) state that target market is a specific group of potential customers that a company seeks to reach through its products or services. This group may share characteristics such as age, gender, income level, education, interests, or geographic location, which increase their chance of becoming interested in and purchasing from a business.

Nails by Acacia caters to a diverse and growing customer base in the beauty and personal care industry. Beauty-conscious people looking for high-quality, professional nail services like manicures, pedicures, gel applications, acrylics, and custom nail art make up the primary market. This includes working professionals, students, brides, and those planning special occasions who want relaxing, luxurious treatments in a clean and welcoming setting.

In addition to beauty service clients, Nails by Acacia serves as a training and empowerment hub, focusing on aspiring nail technicians particularly unemployed or underemployed youth and adults from Dawn Park, Rondebult, and surrounding areas, who want to learn, grow, and start careers in the nail industry. These individuals receive hands-on training, mentorship, and real-world experience that prepares them for work or entrepreneurship. Fingernails by Acacia creates an exclusive and sustainable business by serving clients who value self-care as well as those seeking professional development.

Competitors

According to indeed (s.a) A competitor is a business that provides the same or similar product or service as yours. They may be in the same industry as you or in a completely different one, but it's important to understand that your competitors typically offer something similar to what you're doing.

Nails by Acacia competes with established businesses in the local beauty and nail care market, including Snip nails & beauty salon, and Nails Tales and Beauty.

Snip Nails & Beauty Salon and Training Academy provides both beauty services and training programs, making it a direct competitor.

However, their training is frequently broad-based across beauty disciplines, whereas Nails by Acacia specializes in nail care and technician training, with a focus on community empowerment and local job creation. This specialization allows Nails by Acacia to provide aspiring nail technicians with more in-depth knowledge and better career opportunities.

Nails Tales and Beauty focuses on providing high-end nail care services such as advanced nail art and grooming. While it has a loyal customer base, it provides no formal training or employment opportunities, and its business model is solely focused on client services. Nails by Acacia stands out by combining service delivery with education and skill development.

Nails by Acacia forms out a different space in the market by addressing not only aesthetic needs but also unemployment and skill shortages in Dawn Park, Rondebult, and surrounding communities.

product price strategy

Pricing strategy is important for a business's sustainability, but it can be challenging to determine the appropriate price (Van Aardt and Bezuidenhout ,2019).

To decide on the appropriate pricing strategy, Van Aardt and Bezuidenhout (2019) states that the company considers the pricing strategies of competitors. Some approaches are:

price skimming

Price skimming occurs when a new product is launched at a high price to cover costs for research and development and promotion. For instance, when a new iPhone was launched, it was initially priced higher.

Price penetration

Price penetration involves offering a lower price than competitors in order to increase market share and sales.

Competitive matching

Competitive matching involves setting a price that is comparable to major competitors.

Prestige pricing

Prestige pricing places a product at the top of its price range, distinguishing it as superior in quality and service compared to competitors.

After considering Nails by Acacia's mission to provide accessible services and training while delivering high-quality, professional nail care, the best two pricing strategies are:

Price penetration

Ideal for attracting unemployed people and students from Dawn Park, Rondebult, and surrounding communities. This pricing method contributes to the salon's social impact goal of reducing unemployment by making training and services affordable and accessible.

Prestige pricing

Nails by Acacia can charge higher rates for advanced services (such as bridal nails, luxury packages, or private training) to emphasize the superior quality, hygiene, and skilled craftsmanship that distinguishes it from standard salons.

Price comparison with competitors

Service/Training	Nails by Acacia	Snip Nails & Beauty	Nails, Tales, and Beauty
Gel Application	R200	R300	R350
Acrylic, Polygel, and gel x Application	R230+	R350+	R490+
Nail art (per set)	R250 +	R400+	R520
Basic Nail Technician Training	R3500	R6000- R12000	N/A
Private Nail Training session	R6000	R15000+	N/A

Price Penetration -Nails by Acacia offers basic training for R3500, which is significantly lower than Snip Nails & Beauty R6000 - R12000, giving them a competitive advantage in underserved communities.

Prestige Pricing - The R250-R300 range for detailed nail art is comparable to competitors, but offers value-added services such as sanitized tools, superior products, and custom designs, justifying the slightly higher price.

Advertising & Promotional Strategy

The term "advertising strategy" refers to a brand's long-term plan to reach its target audience. A marketing strategy includes product and pricing offerings, as well as brand marketing and product promotions (Amazon ads, s.a).

Nails by Acacia finds the value of a strong advertising and promotional strategy in increasing brand awareness, attracting customers, and creating job opportunities for aspiring nail technicians. To effectively reach its target audience, the business employs a multiple strategy that includes both online and local marketing methods.

Online Marketing

Online marketing is an important part of the salon's strategy. Nails by Acacia promotes its services and training programs through social media platforms like Facebook, Instagram, and TikTok. These platforms allow the business to present nail designs, highlight student progress, share customer feedback, and interact directly with potential clients. Regular posts, stories, and short videos will increase visibility and interaction. A professional website will also allow for online bookings, provide information about services and training courses, and serve as an educational resource with blog posts, tutorials, and customer service tips. These digital efforts boost brand visibility and develop trust among a larger audience.

Local Marketing

In addition to online efforts, Nails by Acacia utilizes traditional local marketing methods. Flyers will be distributed in nearby malls, neighborhood, schools, shops, and taxi ranks including Dawn Park, Rondebult, and Vosloorus. To promote the products and services and build community trust, the business will attend local events such as beauty expos and school career days. These face-to-face interactions not only attract local customers but also emphasize the salon's role as a training centre that supports local employment.

The promotion strategy involves communicating information to the target market and relevant individuals to influence their attitudes and purchasing behaviour (Van Aardt and Bezuidenhout ,2019).

promotions and incentives

Nails by Acacia makes use of a well-planned series of promotions and incentives aimed at attracting and retaining both customers and aspiring nail technicians. To encourage first-time visits, the salon provides a 5% discount to new clients, and a referral program rewards loyal customers with discounts when they refer friends or family. A loyalty card system provides regular customers with a 50% discount on nail services after every eight visits, thereby increasing repeat business. Students can benefit from early-bird discounts on nail training courses, making education more accessible.

Special promotions are also available during major holidays such as Mother's Day, Valentine's Day, Easter, and Father's Day, which include themed nail designs, discounted packages, and gift vouchers. There are Seasonal promotions that focus on specific nail care needs or trends, such as moisturizing treatments in the winter, floral designs in the spring, warm colours in autumn or vibrant summer colours. To ensure a broad community reach, these targeted incentives are promoted both online and offline through social media and local flyers. Together, these promotions and incentives not only increase revenue but also help to build strong relationships with clients and learners, furthering the salon's mission of empowerment and employment.

Marketing perspective

Nails by Acacia, which is already established as both a nail salon and a training centre that offers education and employment, intends to expand its market presence by capitalizing on its current strengths. The business intends to offer advanced and specialized courses in nail artistry trends, salon leadership, and entrepreneurship to help graduates become independent or open their own salons. Furthermore, Nails by Acacia intends to expand its job creation efforts by increasing training capacity and hiring more graduates in both internal positions and partner salons and spas throughout the region.

To reach a larger market, Nails by Acacia will expand its services by offering mobile nail services, allowing clients to receive premium treatments in the comfort of their own homes, as well as retail sales of branded nail care products and supplies. The business will also enter the retail market by developing and selling its own branded nail care products, including cuticle oils, nail kits, hand creams, and press-on nail collections. To increase brand visibility and customer engagement, the business will expand its digital marketing strategy to include influencer collaborations, social media campaigns, and client referral programs. Future plans include opening new branches in underserved communities and providing franchise opportunities to graduates, allowing them to run their own salons under the Nails by Acacia brand. These growth initiatives position the company not only for profitability but also for long-term community impact.

Product distribution

Product distribution refers to the process of delivering a product or service to the end customer. According to Cant, Strydom, Jooste, and du Plessis (2014) distribution refers to the logistics, channels, and methods used to make products or services available to customers at the right time and place. A well-structured distribution strategy increases market reach and customer satisfaction.

Nails by Acacia will deliver its services and products through both direct and indirect distribution channels:

1. **Salon services** (direct distribution).

Clients can get manicures, pedicures, nail art, and other treatments right at the salon in Dawn Park, Boksburg. This face-to-face interaction ensures a personalized experience and creates customer loyalty.

2. **Training Programs** (Direct Distribution).

Educational services will be provided on-site at the training centre, allowing aspiring nail technicians to gain hands-on experience and mentorship. In the future, online training modules will be introduced to help distant learners.

Balance statement analysis for Nails by Acacia (PTY).LTD

December 2024 (start-up phase)

At the beginning of operations, Nails by Acacia started with a budget of R250 000, allocated primarily to essential assets such as salon equipment, training materials, salon furniture, and an initial inventory of nail products. The first balance sheet reflected a strong asset base with minimal liabilities (around R40 000), allowing the business to focus on growth, training, and employment. Most of the budget was deployed as startup capital, with a healthy cash reserve of around R90 000 and no major revenue reported yet.

December 2025 (growth phase)

By December 2025, the end-of-year balance sheet reflected significant growth and activity. The salon had generated R500 000 in revenue, with total expenses of R420 000, resulting in a net profit of R80 000. From this profit, 20% (R16 000) was paid out as shareholder dividends, while R64 000 was retained in the business to support future growth. The updated balance sheet showed total assets of R254 000, with increased inventory, accounts receivable, and equipment value. Liabilities also increased slightly to R50 000, primarily due to a business loan and accrued operational costs. The equity of the business grew to R204 000, showing strong financial performance, reinvestment, and responsible dividend distribution, which positions the salon for future expansion and stability.

Income statement analysis for Nails by Acacia (PTY).LTD

In **December 2024**, Nails by Acacia experienced limited revenue, earning only R20 000 overall, while operating expenses total is R65,000. This resulted in a net loss of R45 000, reflecting early-stage operational challenges. However, by **December 2025**, sales revenue had significantly increased to R250 000, indicating improved brand awareness and successful customer acquisition strategies. Operating expenses rose to R160 000 due to higher salaries, increased supply requirements, and expanded marketing efforts. Despite the higher expenses, the gross profit reached R160 000, demonstrating substantial improvement in financial performance.

This means the business needs approximately 1 067 clients to cover all fixed and variable costs. By achieving this level of sales, Nails by Acacia successfully reached its break-even point in 2025, resulting in a net income of R0. Although no profit was generated, reaching break-even reflects effective scaling and positions the business for future profitability.

Operational plan

operational structure

An **operational structure** is the way a business organizes its processes, people, and resources to achieve its daily goals. It specifies how various roles and tasks are divided, coordinated, and monitored to ensure a smooth workflow, clear responsibilities, and effective decision-making (Daft, 2021). Daft (2021) explains how a well-designed operational structure enables businesses to increase efficiency, manage growth, and provide consistent customer service. There are **several types of operational structures**, including **flat structures**, which have no hierarchy and promote direct communication, and **functional structures**, which group employees based on specific tasks or skills, such as administration, technical work, or customer service.

type of operational structure: functional suitable for Nails by Acacia (PTY). LTD

According to Daft (2021), a **functional structure** is an organizational model in which employees are classified based on their specific roles, skills, or job functions within a company. This structure clearly defines responsibilities and reporting lines, which improves performance and allows employees to specialize in their specific tasks. Operations, administration, customer service, and technical services are some examples of typical business departments or functions. The functional structure is especially useful for businesses that need specialised expertise while maintaining control and clear communication within each area.

Nails by Acacia, the functional structure will be organized in the following manner:

1. Owner (Acacia)

- Manages business strategy, finances, and supplier relationships, ensuring quality standards across all departments.
- Reports only to themselves (as owner-manager), but delegates tasks to managers and educators.

2. Manager

- Oversees daily salon operations, staff scheduling, customer service, and client issues.
- Reports to the owner.
- Supervises the Receptionist, Nail Technicians, and Cleaner while coordinating with Educators.

3. Receptionist

- Manages bookings, client inquiries, payments, and front-desk operations.
- Reports to the manager.

4. Nail Technicians (three positions)

- Offer nail care services like manicures, pedicures, acrylics, and nail art.
- Report to the Manager.
- Determined to provide excellent service and satisfy the needs of our clients.

5. Educators (2 positions - for the Training Centre)

- Provide training to aspiring nail technicians, oversee education programmes, and maintain training quality.
- Report directly to the Owner to ensure training aligns with the business's vision and industry standards.

6. Cleaner

- Responsible for maintaining hygiene and cleanliness of the salon and training centre.
- Reports to the Manager.

This structure ensures clarity, task specialisation, and efficient communication, supporting both service delivery in the salon and the development of future professionals through the training centre.

key process of operations

According to Chase and Jacobs (2010), the **key operational processes** are the essential activities and systems that a company implements to effectively and efficiently deliver its products or services. These processes are important for meeting business objectives, managing resources, ensuring quality, and satisfying customers.

Key Processes of Operations components are (Van Aardt and Bezuidenhout, 2019):

- The operating cycle
- The facilities needed for operation
- The machinery and equipment needed for production or sales
- Capacity planning
- The staff required
- Maintenance plans
- Inventory and stock control policies
- Purchasing guidelines
- Total quality management
- Plans to boost productivity
- The layout of the business
- The location of the business

- 
1. **Operating cycle:** Daily service operations, from client bookings to nail treatments and training sessions.
 2. **Facilities:** Dawn Park's salon is fully equipped for nail technician training as well as treatments.
 3. **Machine/Equipment:** UV nail lamps, drills, chairs, sterilization tools, and training materials are all examples of machinery and equipment.
 4. **Capacity planning** entails managing client bookings and class sizes to prevent overcrowding and maintain quality.
 5. **Staffing:** Hire qualified nail technicians, receptionists, and training instructors.
 6. **Maintenance:** includes regular upkeep of tools, hygiene standards, and salon cleanliness.
 7. **Inventory control** involves stocking nail products (polish, acrylic, gel, etc.) and tracking usage to prevent waste.
 8. **Purchasing:** Creating dependable supplier contracts for low-cost, high-quality products.
 9. **Quality management:** includes ensuring consistent service quality, client feedback systems, and technician evaluations.
 10. **Productivity boosting:** Seasonal promotions, time-efficient service models, and skill development.
 11. **Layout:** The salon layout allows for both walk-in services and structured training sessions.
 12. **Location:** Strategically located in Dawn Park to serve surrounding communities and unemployed youth.

Transformation Model

Slack, Brandon-Jones & Johnston (2016) affirms that **transformation model** is a framework that describes operations as the process of converting inputs (such as labour, materials, and equipment) into outputs (goods or services), while adding value along the way. This model is important for understanding how businesses manage resources to provide value to customers.

The **input-process-output model** ensures that Nails by Acacia delivers consistent service quality, operational efficiency, and long-term impact through job creation and training. Each role fits into the transformation system, contributing to converting resources into tangible outcomes that benefit both the customer and the community..

input

Resources needed to deliver a product or service. Contains materials, labour, equipment, and knowledge.

- Trained staff (nail techs and educators)
- Nail products: gel, acrylic, and polish.
- Tools and equipment (drills, ultraviolet lamps)
- Business location: Dawn Park, Boksburg.
- Operational financing and owner expertise

process

The transformation activities that add value to the inputs. These are operational activities and management systems.

- Performing nail services (manicures, nail art, etc.)
- Conducting training sessions for students
- Cleaning and sanitizing tools and stations
- Booking and customer care by the receptionist
- Staff management and service supervision

output

The final service or product delivered to the customer. These should meet quality expectations and business goals.

- Beautiful, professionally done nails
- Skilled, certified nail technicians
- Satisfied, loyal customers
- Reduced unemployment and community upliftment
- Strong brand reputation in beauty services

business Approach to planning & management for Nails by Acacia

Nails by Acacia makes use of a customer-centric and operations-focused business strategy for planning and management. This approach combines service quality, employee development, and operational efficiency to ensure consistent delivery of high-quality beauty and nail care services.

Nails by Acacia prioritizes customer needs through service-oriented planning, which includes:

Premium services include manicures, pedicures, and nail art.

Ensuring hygiene, comfort, and customer satisfaction.

Continuously training employees to improve their skills and certification standards.

Operational Efficiency:

- The company prioritizes coordinated service delivery.
- Efficient scheduling, customer booking, and employee deployment.
- Use transformation processes (input-process-output) to manage quality from beginning to end.
- Effective management requires clearly defined job roles and reporting structures.

Strategic Growth Planning:

- The company implements long-term planning, including:
- Expansion strategies (such as franchising or mobile nail services).
- Job creation and skill development (training unemployed people).
- Brand development through marketing and community improvement.

This strategic, customer-first approach enables the company to remain competitive, sustainable, and socially culpable.

Operational structure and functional area

Key Roles and Functional Areas:

1. **Owner (Acacia)** – Strategic Management & Oversight
 - Oversees overall business strategy, supplier relationships, financial planning, quality standards.
 - Directly supervises the Manager (for salon operations) and the Educators (for training).
2. **Manager** – Operations Management
 - Manages daily operations, staff scheduling, customer service, and problem resolution.
 - Supervises the Receptionist, Nail Technicians, and Cleaner.
3. **Receptionist** – Customer Service & Administration
 - Manages appointments, customer communication, front-desk responsibilities, and payment handling.
 - Reports to the Manager.
4. **Nail Technicians (x3)** – Service Delivery
 - Provide professional nail care services including gel, acrylic, and nail art.
 - Focus on client satisfaction and quality standards.
 - Report to the Manager.
5. **Educators (x2)** – Training & Development
 - Train aspiring nail technicians in the training centre.
 - Ensure high standards in course delivery.
 - Report directly to the Owner to maintain alignment with the brand's vision.
6. **Cleaner** – Hygiene & Support Services
 - Maintains cleanliness and hygiene of the salon and training areas.
 - Reports to the Manager.

Functional Areas:

Each role fits into broader functional areas such as:

- Operations Management – Led by the Manager, ensuring smooth daily business flow.
- Education & Training – Managed by Educators, delivering high-quality training.
- Customer Service – Handled by the Receptionist and Technicians.
- Support Services – Hygiene and maintenance led by the Cleaner.
- Strategic Management – Handled by the Owner, focused on long-term planning and growth.

This structure supports both the service delivery and training components of the business, ensuring Nails by Acacia runs efficiently while empowering job creation and education.

- Access to exclusive training tools and certifications

9. Organisational Policies

The Employee shall comply with company policies relating to:

- Dress Code (clean, professional appearance)
- Client Etiquette
- Health & Safety Procedures
- Code of Conduct
- Confidentiality and Non-disclosure
- Equal Opportunity and Non-Discrimination (as per the Employment Equity Act 55 of 1998)

10. Termination of Employment

- Either party may terminate the contract with 1 (one) calendar month's written notice
- Termination without notice may occur due to gross misconduct, fraud, negligence, or breach of company policy
- Upon termination, the Employee must return all company property and complete an exit interview

11. Breach of Contract

Violation of this agreement, including disclosure of confidential training content or misconduct, may lead to disciplinary procedures, including dismissal, in line with the Labour Relations Act 66 of 1995.

12. Resignation Clause

The Employee agrees to provide a written resignation with one full calendar month's notice. Early exit must be approved by the Employer and may result in forfeiture of benefits.

13. Governing Law

This agreement is governed by the laws of the Republic of South Africa, including but not limited to:

- Basic Conditions of Employment Act 75 of 1997
- Labour Relations Act 66 of 1995
- Employment Equity Act 55 of 1998
- Skills Development Act 97 of 1998

14. Acknowledgment

The Employee acknowledges that they have read and understood the contents of this contract, and agree to be bound by its terms. Signed at [Location] on this ___ day of _____ 202__

Employer (Nails by Acacia) Employee

Name: Acacia [Surname] Name: [Employee Full Name]

Signature: _____ Signature: _____

Date: _____ Date: _____

conclusion

In **conclusion**, Nails by Acacia is more than just a salon; it is a purposeful business that combines beauty services with community upliftment and skills development. The business aims to contribute meaningfully to the local economy by reducing unemployment, especially among young women, through accessible education and job creation. With a clear vision, strong operational structure, and a focus on innovation, training, and superior customer service, Nails by Acacia is positioned for growth and long-term sustainability. The business is committed to maintaining high hygiene and service standards, offering quality nail treatments, and empowering individuals with the skills to build successful careers in the nail industry. Through continuous improvement and strategic partnerships, Nails by Acacia is set to expand and become a household name in township beauty and skills education.
